## PROUD TO INTRODUCE

For decades now, the Fidanza team has supplied the world with the best in high performance products. We've put our race heritage into each and every one of them. From our aluminum flywheels to our CV shafts. However, it just seemed as though something was missing. What was it? The other half of the equation, C-L-U-T-C-H-E-S. Fidanza's new line of performance clutches is just what the clutch market has been needing and asking for. These are it. The perfect compliment to our flywheels, decades in the making.

## TOO MANY QUESTIONS? NOT ENOUGH ANSWERS?

Which plate do I use? How much clamp load do I need? Do I need four or six pads and should they be carbon or Kevlar®? It's tough to know if your making the right choice when it comes to selecting a clutch kit. Most of the time you won't know until you get it installed.

That's all changed! Our catalog is easy to read. Our clutch kits are complete and make for an easy decision based on your vehicle and your driving habits. You get it right the first time. No more having to figure out which disc goes with which pressure plate. No more wondering why you have to spend extra money to get a new throw out bearing or other needed components.

## GET THE KIT

We know not all vehicles are the same. Not all drivers look for the same thing when purchasing a clutch. For this reason we offer four different levels of performance. From the mild to the wild. We've got the right clutch to suit your style. It's all there. When purchasing one of our clutches you only need to know one part number, that's it. Find the application

you need, the level you want and you get it all, the pressure plate, the disc, the throw out bearing and the pilot tool. Wanna make it a combo? Add a light-weight aluminum flywheel.

## THE RESOURCES

Our clutches are designed for peak performance and we've made them extremely easy to purchase. Peak performance comes from engineering partnerships that allow us access to design and manufacturing capabilities that until now have been absent from the after-market. The ability to use the latest equipment, the best engineers and real world testing allows us to offer clutch designs with OE quality and after-market performance.

**We have partnerships with other top engineers. Access to the latest and greatest equipment and software. Most importantly we have a passion that can never be matched.**

## A CUT ABOVE

Keep in mind that our clutches are born from performance materials and parts. This makes our clutches a cut above all the other manufacturers who assemble original equipment materials and parts then label it as a performance product.

## CLAMP LOAD MEASUREMENT

When reading this graph right to left you will see that a new disc has a clamp load of 1550 lbf. Which, if left alone, gradually gains in clamp load as it gets used. Eventually it will achieve peak performance. To claim that they have the highest clamp load, other clutch companies thin the disc to that specific point of peak performance (1650 lbf). However, unlike the new disc it does not gain clamp load. It loses it, until failure has rapidly occurred.

Fidanza clutches not only have a higher clamp load, they get stronger as they wear. So not only do you get a stronger clutch, you get a clutch that will lasts.

## PRESSURE PLATE

Some performance clutch companies take a new clutch and thin out the disc in order to gain more clamp load. While this can increase the clamp load, it rapidly decreases clutch life. Without the proper testing and equipment, this may lead to an undesirable condition.

## 2.1

### CARBON KEVLAR®

Combine carbon and KEVLAR®, give them a steel backing and you have the most durable, longest lasting street clutch available. We've engineered our torsion damper and marcel cushion to engage smoothly yet quickly. Perfect for the daily drivers. We recommend this disc to those who drive their vehicle every day, in all conditions.

### RECOMMENDED UPGRADES

## 3.2

### KEVLAR®

Like our lightweight flywheels we choose to use the very best in materials. That's why we designed our Three Point Two with Kevlar® buttons. With 100% Kevlar® friction you get more grip and more life than the Two Point One. With the increase in friction you'll notice a little drop in drivability and a increase in performance. Even without the marcel the torsion damper gives this disc the ability to be used as daily driver. Just behave and be patient during its 500 mile break-in period. Once that's over you can be as nasty as you want.

### RECOMMENDED UPGRADES

## 4.3

### CERAMIC

This is one mean clutch. Your footwork better be good, it's no walk in the park. Just because it has a torsion damper like the Three Point Two doesn't mean it drives like it. Those are ceramic buttons attached to that puck. They provide quite a grip upon engagement. That means power is planted straight to the pavement. Don't be scared though, it's not going to give you a larger left leg. Just quicker engagement.

### RECOMMENDED UPGRADES

## 5.4

### SINTERED IRON

If you choose Five Point Four your either building an all out race car or a rocket. This disc will show you what grip really feels like. As you can see there is no torsion damper, no marcel, and the pads are made from sintered iron. What you'll feel - instantaneous power. This is for the racers.

### RECOMMENDED UPGRADES

## ALUMINUM FLYWHEELS

Our aluminum flywheels are made from the highest quality 6061 T6 aluminum. The material is fantastic for strength, heat dissipation and of course reduction in weight. The friction surface we use is an incredibly strong 1045 steel. The plates are milled to meet our high specifications. A Fidanza flywheel can mate with any type of clutch material, including organic, kevlar, ceramic, metallic and sintered iron. We attach the replaceable friction surface with military grade aerospace fasteners. With these replaceable plates there is no need to replace the entire flywheel when the clutch or flywheel is at the end of its life, saving time and money. The ring gears we use are also made from 1050 steel and are heat treated for durability. The gears are heated then pressed on and secured with grade 8 button screws. We were the first to utilize a stepped dowel system in most of our flywheel applications. This doweling method ensures that once the pressure plate is installed the dowels cannot be removed because they become locked into place.

No chromemoly can compete with the awesome serviceability, strength and superior design of Fidanza's aluminum flywheels. If there was a better material out there, we would be using it.

### HARDWARE

- 1 STEPPED DOWELS\_ ONCE PRESSURE PLATE IS INSTALLED THEY BECOME LOCKED IN PLACE
- 2 FASTENERS\_ MILITARY SPEC QUALITY
- 3 REPLACEABLE FRICTION PLATE\_ 1045 STEEL
- 4 RING GEAR\_ 1050 STEEL / HEAT TREATED FOR DURABILITY
- 5 BODY\_ 6061 T6 ALUMINUM

## STEEL FLYWHEELS

Our steel flywheel differ from the competition by being not only durable but serviceable. Another reason they out perform the competition is that the body is milled from a 1045 billet steel slab. The 1045 is a high carbon steel. It's incredibly strong and can withstand the rigors of the most extreme engines, drivers and conditions. Of course all Fidanza steel flywheel include a serviceable 1045 steel insert for the clutch to ride on, which is attached using the highest quality aerospace fastener. We attach the ring gear just like we do with the aluminum flywheel. Each steel flywheel weighs approximately the same as the stock piece.

### HARDWARE

- 1 STEPPED DOWELS\_ ONCE PRESSURE PLATE IS INSTALLED THEY BECOME LOCKED IN PLACE
- 2 FASTENERS\_ MILITARY SPEC QUALITY
- 3 REPLACEABLE FRICTION PLATE\_ 1045 STEEL
- 4 RING GEAR\_ 1050 STEEL / HEAT TREATED FOR DURABILITY
- 5 BODY\_ 1045 HIGH CARBON STEEL

## ADJUSTABLE CAM GEARS

Fidanza adjustable cam gears are made from the highest quality 6061 T6 aluminum. They are CNC machined to more exacting tolerances than original gears. The tooth edges are beveled to increase belt life. With twelve degrees (both advance and retard) of laser etched adjustments you can be assured of proper and precise tuning.

The inner ring is designed for strength, function, and precision. Stainless steel studs are threaded through the backside of the outer gear. The inner gear is then fastened with stainless steel nuts and lockwashers. This enables an increase in the amount of torque used to tighten the fasteners, with no risk of stretching to the aluminum threads. All chain drive gears have a 1050 steel outer sprocket. All belt drive gears are made from 6061 T6 aluminum.

## HARDWARE

- 1 STAINLESS STEEL FASTENERS\_ NOT THREADED THROUGH ALUMINUM INNER / CAN INCREASE TORQUE TO TIGHTEN NUTS
- 2 6061 T6 ALUMINUM INNER\_ LIGHTWEIGHT / CAN BE ANODIZED IN CLEAR, RED, OR BLUE
- 3 1050 STEEL OUTER\_ CHAIN DRIVE GEARS 6061 T6 ALUMINUM\_ BELT DRIVE GEARS
- 4 24° OF ADJUSTMENTS\_ 12° ADVANCE / 12° RETARD

## FLEX PLATES

Built for strength, our flex plates are designed with durability as the number one priority. Made from a high tensile steel that is milled to .030" thicker than the original. This design allows for incredible strength while still allowing for the flex that is required when the torque convertor balloons. After stamping, the heat treated ring gear is attached with double welds on both sides. The entire assembly is then yellow zinc plated.

## CV SHAFTS

Fidanza CV Shafts are designed for optimum strength and performance. Each CV Shaft has a rating of up to 300 HP. They incorporate outboard joints that are 30% stronger than stock joints, as well as a 4340-chromemoly outer joint stub. The shafts' center tube is also 30% thicker than standard tubes, and is manufactured from high-tensile steel. Thick, rugged boots are loaded with high-temperature, high-pressure synthetic grease to protect and lubricate the CV Joints. All pertinent shafts include an ABS (anti-lock brake system) ring to ensure the system remains functional on ABS-equipped vehicles.

## SHORT THROW SHIFTER

There are so many short throw shifters on the market, however, only Fidanza has a shifter available that stands out amongst all others. These shifters are made from the highest quality aluminum and hardened steel. Three dimensional imaging and machining are used to get the finest profile for fit and functionality. The shorter the throw the quicker you go, and Fidanza will get you to the finish line first.

## **ATTENTION:**

**ALL APPLICATIONS ARE LISTED USING THE VERY BEST SOURCES AVAILABLE. THE END USER MUST VERIFY FITMENT BEFORE INSTALLATION.**

**1** REPLACEMENT OF DUAL MASS FLYWHEEL MAY CAUSE ADDED GEAR NOISE  
**2** DESIGNED FOR after-market STACKED STYLE CLUTCH. CHECK FOR FITMENT  
**3** 1996 AND UP MUST USE 1995 CLUTCH AND FLYWHEEL MOUNTING BOLTS (NOT INCLUDED)  
**4** CALL FOR COMPLETE APPLICATION LIST  
**5** EXTERNAL BALANCE WEIGHTS ARE INCLUDED IN THE HARDWARE KIT SUPPLIED WITH THE FLYWHEEL  
**6** MUST USE ORIGINAL MAZDA PART #N351-11-521 (NOT INCLUDED)  
**7** CONFIRM FITMENT BEFORE INSTALLATION  
**8** FOR 383 OR 400 C.I.D. ENGINE MUST USE PART# 624001 BALANCE PLATE  
FOR 454 C.I.D. ENGINE MUST USE PART# 624541 BALANCE PLATE  
FOR 502 C.I.D. ENGINE MUST USE PART# 625021 BALANCE PLATE  
**9**  
**10** INCLUDES 10.4" CLUTCH PATTERN  
**11** INCLUDES 10.4" & 11" CLUTCH PATTERNS  
**12** INCLUDES 8.5", 9" & 9.5" CLUTCH PATTERNS  
**13** INCLUDES 10.5" BORG & BECK AND 10.5" METRIC CLUTCH PATTERNS  
**14** INCLUDES 10.5" & 11" LONG STYLE AND 11" DIAPHRAGM CLUTCH PATTERNS  
**15** INCLUDES 11" & 11.5" 3 FINGER AND 11" DIAPHRAGM CLUTCH PATTERNS  
**16** INCLUDES 10.5" & 11" 3 FINGER AND 11" DIAPHRAGM CLUTCH PATTERNS  
**17** INCLUDES 10", 10.5" & 11" 3 FINGER AND 11" DIAPHRAGM CLUTCH PATTERNS  
**18** USE OF LOCATING DOWELS FOR CLUTCH NOT NECESSARY  
**19** USE 95 NEON 2.0L STANDARD TRANSMISSION FLYWHEEL MOUNTING BOLTS  
**20** APPLICATION REQUIRES TWO (ONE PAIR)  
**21** RE-USE OE BOLT ON RING GEAR  
**22** EXCEPT REVERSE MOUNT CLUTCH/FLYWHEEL ASSEMBLY  
**23** SOHC REQUIRES ONE  
**24** PLEASE CALL FOR RELEASE DATE DETAILS  
**25** MUST USE VW/AUDI PART N907-059-01, FLYWHEEL TO CRANKSHAFT BOLTS, FOR SAFE AND PROPER INSTALLATION  
**26** IF FRICTION SURFACE HAS A 11.75" DIAMETER ORDER PART # 221171  
IF FRICTION SURFACE HAS AN 11" DIAMETER ORDER PART # 221101  
**27** IF FRICTION SURFACE HAS A 8.75" DIAMETER ORDER PART # 228751  
IF FRICTION SURFACE HAS A 9" DIAMETER ORDER PART # 229001  
**28** IF FRICTION SURFACE HAS A 9.85" DIAMETER ORDER PART # 229851  
IF FRICTION SURFACE HAS A 9.5" DIAMETER ORDER PART # 229501  
**29** IF FRICTION SURFACE HAS A 5.075" INNER DIAMETER ORDER PART # 228501  
IF FRICTION SURFACE HAS A 5.875" INNER DIAMETER ORDER PART # 228591  
**30** FITS EXHAUST SIDE ONLY  
**31** FITS BOTH INTAKE AND EXHAUST CAMS ON 1990-97 MODELS. FITS EXHAUST CAMS ONLY ON 1999-03 WHEN STOCK ECU IS USED.  
**32** 360 C.I.D. ENGINE MUST USE INCLUDED WEIGHT

ATTENTION:

ALL APPLICATIONS ARE LISTED USING THE VERY BEST SOURCES AVAILABLE. THE END USER MUST VERIFY FITMENT BEFORE INSTALLATION.

## READING THE CLUTCH GUIDE

- First find the make of the car. Each make is given its' own section, listed by alphabetical order and separated by red bars.

CLUTCH APPLICATION GUIDE			
MAKE	YEAR	ENGINE	DIMENSIONS
<b>ACURA</b>

301221	301222	301222	301224

- Second find the model of the car. Each model is listed in alphabetical order within the **MAKE** section. There may be more than one listing for that particular model. If this is the case, search for the year in which the model was produced. If there is more than one model made within that year then the engine column should narrow it down even further.

- You will notice that there are four different part numbers. However, within one part number you receive the pressure plate, disc, throw-out bearing and pilot tool.
  - SECTION 1** is our Two Point One clutch kit.
  - SECTION 2** is our Three Point Two clutch kit.
  - SECTION 3** is our Four Point Three clutch kit.
  - SECTION 4** is our Five Point Four clutch kit.

## READING THE FLYWHEEL GUIDE

- First find the make of the car. Each make is given its' own section, listed by alphabetical order and separated by red bars.
